PROFESSIONAL SUMMARY

I develop statistical and measurement models to analyze educational data and apply them to practical problems in education. My research focuses on methods that help us better understand student development, differences across groups, and factors that shape assessment outcomes.

At WIDA, I work with large-scale K–12 language assessment data on scaling, validation, and measurement invariance. I also use statistical models to predict and interpret assessment results. Looking ahead, I aim to extend this methodological work to emerging forms of educational data, including AI-assisted scoring and bias in AI-generated responses.

I have also conducted longitudinal research on student development, including changes in growth mindset, academic emotions, and mathematics self-efficacy. By connecting methodological research with applied educational studies and large-scale assessment practice, I hope to collaborate across disciplines and produce evidence that informs educational practice and policy.

RESEARCH

Psychometrician

WIDA

2024/4-present

- Wisconsin Center for Education Research, University of Wisconsin–Madison
- Conducted simulations to evaluate test quality and multistage adaptive testing designs for calibrating ACCESS Listening and Reading abilities.

- Evaluated language assessment items using item response theory (IRT).
- Conducted vertical scaling across ACCESS grade clusters.
- Contributed to standard setting to establish criterion-referenced ACCESS cut scores.
- Authored sections of the Alternate ACCESS annual technical report.
- Evaluated comparability across test years and between paper and online ACCESS administrations.
- Contributed to MODEL test redesign through design simulations, MODEL-to-ACCESS prediction, and calibration process revisions.
- Calibrated Alternate ACCESS items and scores.
- Conducted differential item functioning (DIF) analyses for ACCESS and Alternate ACCESS.
- Performed equipercentile linking across ACCESS forms 603 and 700 and Alternate ACCESS forms 601 and 602.
- Contributed psychometric analyses to a Braille test development project.
- Developed longitudinal modeling methods to study bilingual students' language development and compare program effects in the New Mexico Bilingual Multicultural Education Program study, with a focus on Spanish–English programs.
- Conducted Alternate ACCESS validity analyses, including dimensionality checks, confirmatory factor analysis (CFA), and reliability analyses.

Post-doc Fellow	FLPS project	2023/9-2024/3
• Institute of Education Sciences (IES) grant; \$891,895; 2021–2025; PI: Tiffany Whittaker • Developed fully latent principal stratification (FLPS) models that incorporate measurement models into causal inference for randomized studies. • Integrated Rasch, two-parameter logistic (2PL), graded response (GRM), and generalized partial credit (GPCM) item response models into the FLPS framework. • Conducted extensive simulation studies to evaluate model performance under varied conditions. • Applied the models to empirical education data to demonstrate their practical use. • Contributed to implementation and dissemination of the methods through the flps R package.		
Research Assistant	FLPS project	2021/9-2023/8
• Development of 'flps' package for Fully-latent Principal Stratification		
Research Fellow	Embedded Standard Setting (ESS)	2021/6-2021/8
• Internship for developing ESS package for Embedded Standard Setting		
Research Fellow	Embedded Standard Setting (ESS)	2020/6-2020/8
• Internship for developing Shiny app for Embedded Standard Setting		
Research Assistant	'maat' package development project	2019/9-2020/5
• Development of MAAT package for Computerized Adaptive Testing for Northwest Evaluation Association (NWEA)		
Research Assistant	Survey of COE Full-Time Tenured and Tenure-Track Faculty	2019/9-2019/12
• Data analysis for surveys of graduate programs of education at the University of Texas at Austin		
Research Assistant	President's Award for Global Learning (PAGL)	2019/1-2019/8
• Designing a culturally appropriate mobile application to increase mental health literacy and self-care habits among South Korean young adults		
Research Assistant	CGS PhD Career Pathways project	2018/9-2019/5
• Data analysis for surveys to collect data on the career pathways of past and present STEM and humanities PhD students.

Invited Special Talks

Introduction to Basic Linear Algebra for Statistics

2025/05

- Materials: sooyongl.github.io/introEverything/introMath/0_presentation.html
- Conducted foundational training sessions on linear algebra for advanced statistics

Introduction to Latent Class Analysis

2024/09

- Materials: sooyongl.github.io/introEverything/introMplus/2_mixture_modeling_1.html
- Conducted introductory training sessions on latent class analysis

Shiny app development using flexdashboard

2023/01

- Materials: sooyongl.github.io/introEverything/introShiny/slides/slides_1.html
- Conducted introductory training sessions on building Shiny applications in R

Visualization with ggplot2

2022/06

- Materials: sooyongl.github.io/introEverything/introPlot/ggpractice/slides/ggplot_slides.html
- Conducted hands-on training sessions on data visualization using the ggplot2 package

LGM using lavaan package

2021/06

- Materials: sooyongl.github.io/introEverything/introLGM/slides/lgm_using_lavaan.html
- Conducted introductory training sessions on latent growth model analysis using the lavaan package

Applied Research using R

2021/05

- Materials: sooyongl.github.io/introEverything/tryApplied/tryapplied.html
- Conducted introductory training sessions on conducting applied research using R

Simulation Study using R package development

2021/05

- Materials: sooyongl.github.io/introEverything/trySimulation/xaringan_presentation.html
- Conducted introductory training sessions on statistical simulation analysis using R packages

Data Generation in R

2021/03

- Materials: sooyongl.github.io/introEverything/dataGeneration/slide/slide_dataGeneration.html
- Conducted training sessions on data generation techniques for statistical simulation
